

# Independent Practice with KidSkills™ #1

## Scenario:

You have just completed teaching about Eli Whitney, the invention of the cotton gin, and Southern farming in the 1800's. Topics included how the cotton gin was useful, who did most of the work to get the cotton to the new machine, how processing of cotton was done before the cotton gin, and how the cotton gin works. Students learned that Eli Whitney was an inventor who helped begin the industrial revolution. Katalina needs to select a tool to help her organize the new information. Think about iKidSkills tools that are available and how she might use one to show Katalina how to organize the new information.

This is what a completed Big Chunker might look like.
